

UNIVERSITY OF PÉCS FACULTY OF LAW

QUALITY POLICY

STUDENTS

Our goal: Providing training on every level that is of high quality and responds to the market demands, based on which students name faculty of law in Pécs as their first choice among the higher education institutions. For this purpose we measure and improve our students' satisfaction; we strive to provide our graduates knowledge that meets the job market demands; we apply innovative and practice-focused educational methods; we enhance our students' learning experience by constantly developing the education methodology; we involve our students in the decisions affecting them; we increase the number of foreign students with the help of our foreign language educational programs; we keep strong relations with our alumni.

COLLEAGUES

Our goal: We ensure that our colleagues reckon the cooperative innovative community they work in a value. We promote the self-improvement by providing an environment where people possess the necessary tools, resources, feedbacks and leadership to advance their career and reach success in their work. For this purpose we take care of people's physical and mental health; choosing and improving outstanding colleagues; recognising and rewarding excellence; training world class experts in education, research and practice within the fields of science represented by the faculties. We believe that our strength is in the diversity of our community. We aim to achieve outstanding results in partnership with our students and other foreign universities. We create conditions and circumstances that support the flow of knowledge and technology. We aspire for the professional human resources management. We help our colleagues' pursuits in learning, education, medicine and research. We provide family friendly work circumstances.

RESEARCH EXCELLENCE

Our goal: We pursue multidisciplinary and cooperation-based research activity that focuses on relevant challenges. Our high quality research activity is built on strong ethical standards. We endeavor to combine the disciplines in novel ways so that the concerned parties feel promptly involved in the research. For this purpose we develop an atmosphere that motivates innovative ideas and processes; we support international research cooperations; we encourage research cooperations formed with other higher educational institutions, enterprises and other national, regional and international organizations. We create sufficient conditions for the parties of the research cooperations that support the smooth flow of expertise and knowledge, for instance the marketization of innovative ideas; we increase the reputation and social acceptance of our research results by involving media and other channels; we create research-intensive work environment where education also has an active role and research results are continuously integrated to the education; we ensure the financial background supporting the research and publication activity; we determine the research topics based on the strengths of the institution and harmonize them with long-term strategic goals.

COOPERATION

Our goal: We aim to form professional relations with organizations outside the university that improve the employment chances of our graduates and support the research activity, learning and knowledge sharing. For this purpose: we take care of developing international partnerships; we improve our market position so as to several foreign students and lecturer choose the University of Pécs either for short-term or long-term educational aims or professional visits; we enhance the global perspective in the curricula; we encourage our inland and foreign alumni students to help our students with their experiences during the integration into the job market; we aim to form sufficient research and cooperation relations with other universities, regional, national and international organizations and enterprises; we keep strong relations with the financing organizations.

TECHNOLOGY

Our goal: Break down our physical barriers to become a „limitless” digital university. For this purpose we use the most up-to-date digital technology in our education and researches; we help our students and colleagues to join the global digital environment; we provide a digital environment supporting the effective work; we constantly develop our infrastructure; we aim at an outstanding online presence.

MARKETING

Our goal: We enhance our reputation and develop an internationally recognised brand with our marketing activity. For this purpose we increase our reputation regionally, nationally and internationally as well; by always bearing in mind our headline values we firm the image of the institution brand for our key partners; we motivate our students’, partners’ and alumni’s commitment to our institution with the help of clear, constant marketing communication that affects everyone.

SUSTAINABILITY

Our goal: We aim to make our operation sustainable in every aspect and show a positive example to our environment. For this purpose we take into consideration the principle of sustainability when making decisions; we aim at a stable financing; we use our resources to achieve our goals, we manage our activities through business considerations; we look for environment-friendly solutions; we pay attention to our energy use and reduce it in proportion with our possibilities.

Pécs, 11 December 2018

Dr. Adrián Fábri
