

THE ENERGY SECTOR IS NOT ONLY FOR GUYS! CALL FOR APPLICATIONS

DEADLINE: 25 June 2021

Be part of shaping the future!

Start your carrier in the energy sector!

Join WONY's mentoring program and we will help you get acquainted with this exciting sector and assist you to improve your career opportunities.

Do you think that the energy sector is only for guys? Are you afraid that only men can get a meaningful job in this sector? Do you think this sector only offers opportunities if you have a degree in engineering? We do not think so. We are here to bust these myths.

Our Association aims to increase the publicity and visibility of all the exciting, but not so well-known jobs this sector can offer to the young generation of female professionals. Our members have joined forces to support each other and the young generation of female university graduates to support their entrance to the job market and enhance their carrier opportunities in the energy sector.

If you are studying engineering, law, economics or communication and you have completed at least 2 semesters you should consider applying to our mentoring programme for the 2021 fall and 2022 spring semester. Mentors with extensive and diverse experience in the energy sector will help you to:

- learn about your carrier opportunities
- have a taste of what it feels like to work in this sector through your personal mentor,
- take part in networking events
- develop your skills and competencies essential at the job market and carrier development
- benefit from personal consultation by our members active in various segments of the energy sector.

The application period is now open!

**Send us your application by submitting the application form that you can find on this [link](#).
The deadline for application is 25 June.**

We count on applicants to be able to take part in all the activities the programme offer, but occasionally we can also provide online consultation. Please only apply if you can dedicate at least 40 hours in the two semesters to participate in the programme activities.

We will notify eligible applicants about the next steps of the admission process by the end of July.
